

FEMS is...

- a network of 52 microbiological societies
- bringing together around 30,000 microbiologists
- publishing five journals on microbiology research
- stimulating global dissemination of microbiological knowledge
- investing in science: journal revenues sponsor more than 300 early career researchers every year

Member Services

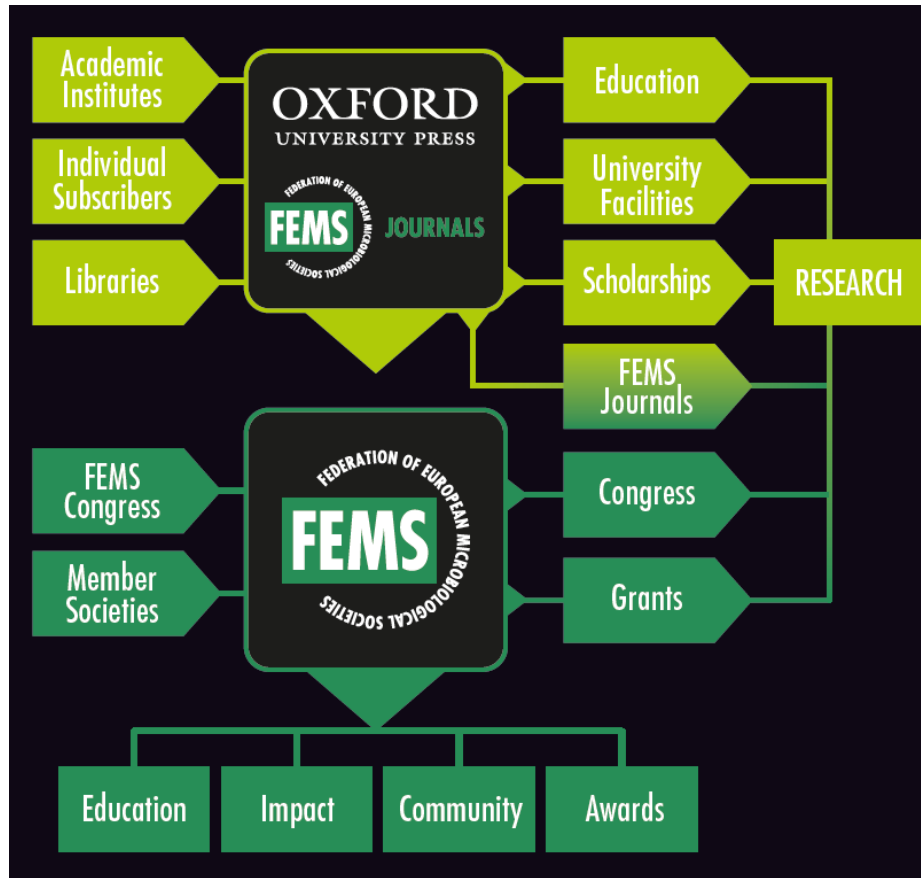

If you are a member of a FEMS member society you are entitled to:

- A discount off the registration fee for FEMS congresses
- A 25% discount off OUP books
- Apply for FEMS grants

Find out if your society is a FEMS member at

www.fems-microbiology.org

Investing in science

Our journal revenues are reinvested in research, education, impact, community and awards – and so are our publisher’s

Find out more about our grants, awards and other activities at www.fems-microbiology.org

FEMS Grants

Our main charitable activities consist of giving out

Type of Grant	In 2015
Meeting Attendance Grants for early career scientists who would like financial support to attend a meeting	31
Meeting Grants for meeting organisers who would like to gain financial assistance in order to hold a meeting within Europe	23
National / Regional Congresses for meeting organisers who would like to gain financial assistance in order to hold a meeting within their country or region	9
Research Grants for early career scientists who would like financial support to undertake research for up to 3 months in another European country	40
Grants for scientists and researchers who would like financial support to attend FEMS Congress	138

One Health for Life

JOINT THEMATIC ISSUE CALL FOR PAPERS

FEMS Microbiology Ecology and Pathogens and Disease

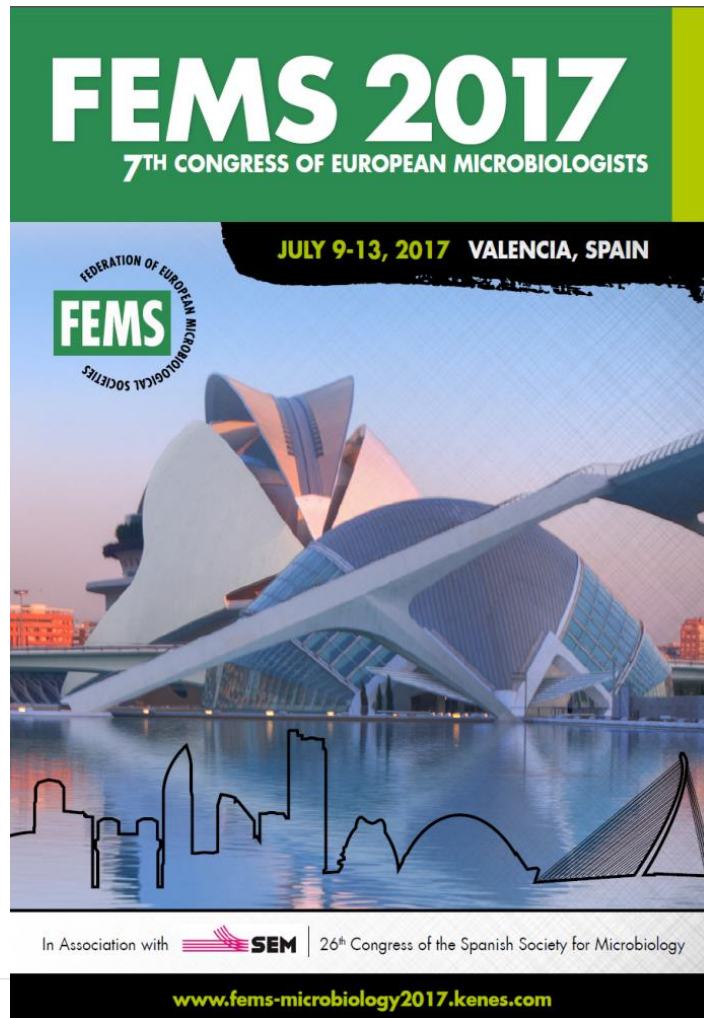

In recognition of the significance of the **One Health** concept, **Pathogens & Disease** and **FEMS Microbiology Ecology** that publish on the health of humans and that of their environment, are teaming up to organize a joint thematic issue on the theme of One Health.

All types of articles are welcome: perspectives, minireviews, research articles, commentaries, although the central idea is to share provocative thoughts in any of the formats.

Upon publication of these articles, a virtual joint thematic issue will bring together articles from both titles and will be promoted by FEMS and their publisher, Oxford University Press.

Read the current virtual issue on **One Health**.

Join the Next Congress – Valencia 9-13 July 2017

The 7th Congress of European Microbiologists (FEMS 2017)

- one of the leading conferences of its kind
- connecting thousands of international microbiologists
- hosting some of the best speakers to present the latest in microbiology research
